Code for Change

UI/UX training encompasses comprehensive learning in user interface (UI) and user experience (UX) design.

NEST.JS
2023

CSIT Association of Nepal

I have completed specialized training in Nest.js, a progressive Node.js framework known for its efficiency in building scalable and maintainable server-side applications.

FULL STACK
DEVELOPMENT,
2024

Shequal Foundation

I have completed one-year training program designed to enhance both professional and technical skills.

ACADEMY

**BACHELOR OF
INFORAMTION
MANAGEMENT**

April, 2020 -
Present

Pokhara Kanya Campus , Pokhara

I am currently exploring the integration of management with advanced information technology skills. I am learning how information systems support and enhance business operations, and I'm gaining practical experience in designing and managing databases for efficient data storage and retrieval. Networking and cybersecurity courses are equipping me with the knowledge to ensure the security and reliability of computer networks and digital assets. I am also developing proficiency in various programming languages to create tailored software solutions, and I'm honing my project management skills to effectively plan and execute IT projects. Additionally, I am studying business analytics techniques to extract valuable insights from data and contribute to strategic decision-making.

+2

July, 2018 -
March, 2020

pokhara higher secondary school , pokhara

In the +2 Management faculty, I learned the basics of business operations and environments through Business Studies. I studied financial statements, bookkeeping, and accounting principles in Accountancy. Economics taught me concepts of microeconomics and macroeconomics. I developed effective business communication skills and applied mathematics, including statistics and financial math, in my studies.

PROJECTS

Online Bus service system

Online Bus Service System is web based application that simplifies booking bus tickets. Using HTML, CSS, Bootstrap, and JavaScript for the front end, it offers a smooth and visually appealing interface. PHP manages tasks like processing payments, checking seat availability, and updating information on the back end..
